

1. Predicting Early Turnover: AI Models for Identifying At-Risk Employees During Onboarding

1.Business Process 1

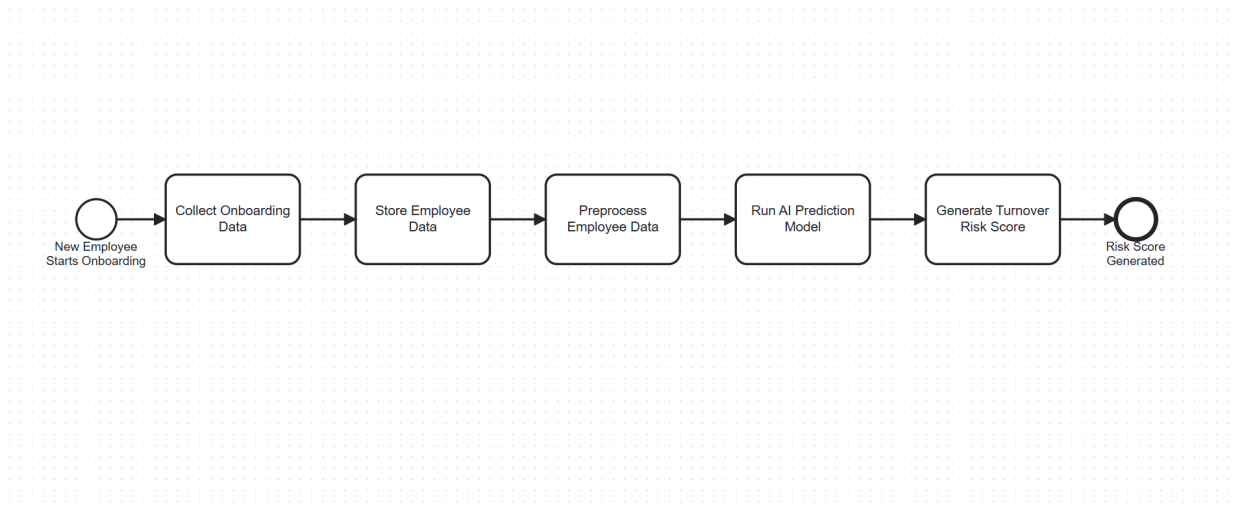

1.1. Use Cases

Epic 1: data collection and AI risk prediction

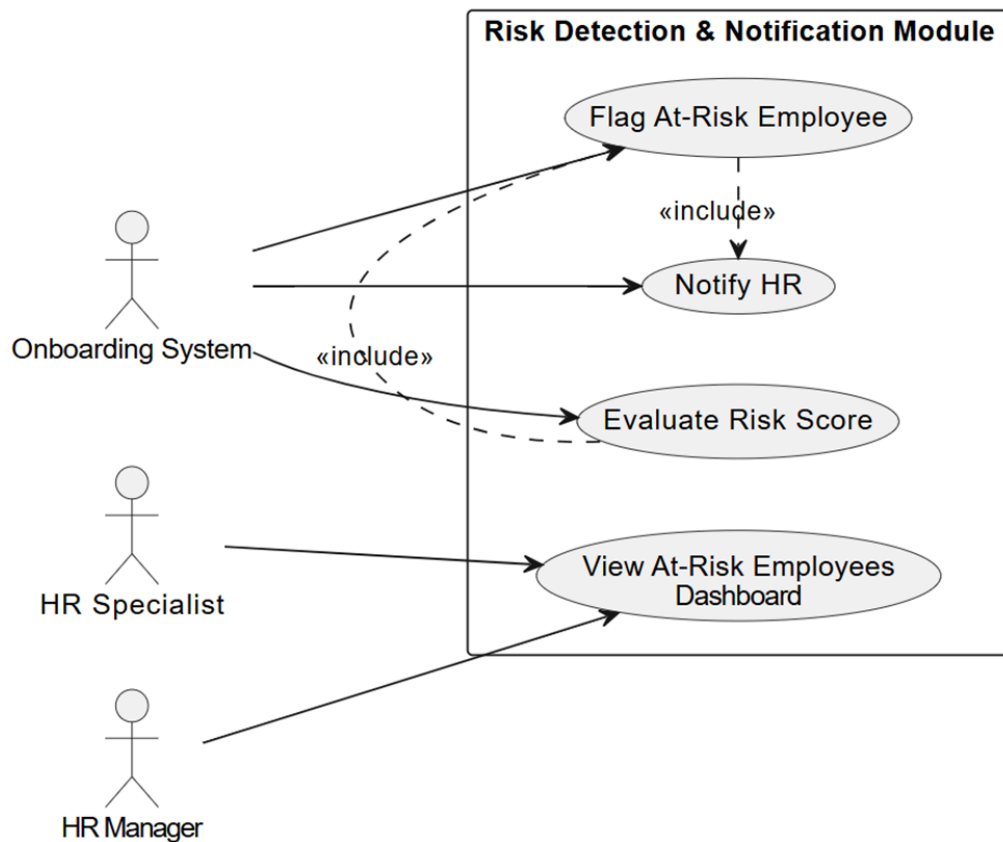

#	User Story (As a ... I want to ...)
1	As an Onboarding System, I want to collect employee onboarding data so I can track employee engagement and progress.
2	As an Onboarding System, I want to preprocess employee data so I can prepare it for accurate analysis.
3	As an Onboarding System, I want to analyze onboarding data using an AI model so I can identify potential turnover risks
4	As an Onboarding System, I want to generate a turnover risk score for each employee so I can support risk evaluation.
5	As an HR Specialist, I want to view employee turnover risk scores so I can identify employees who may require attention.

BPMN 1

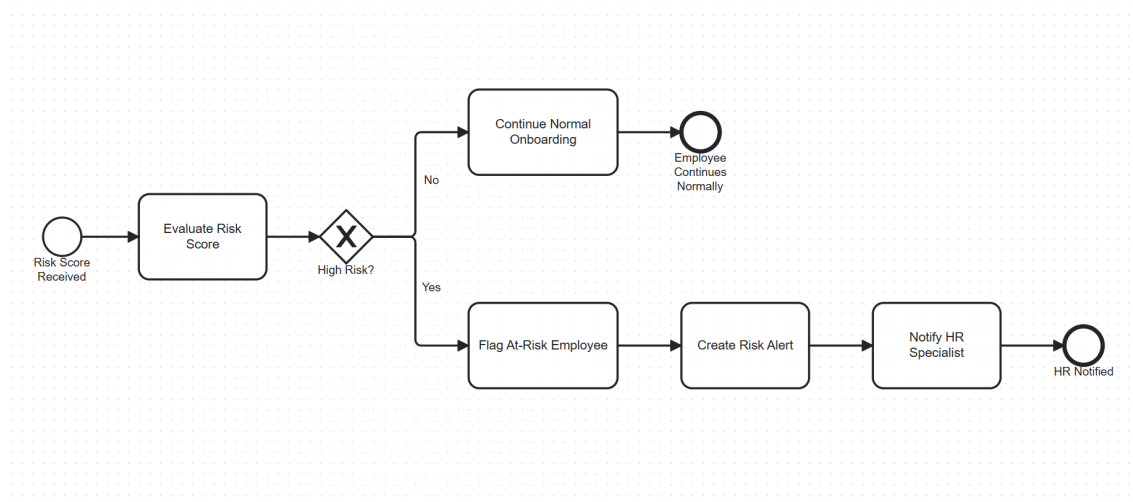

Epic 2: Risk Detection & Notification

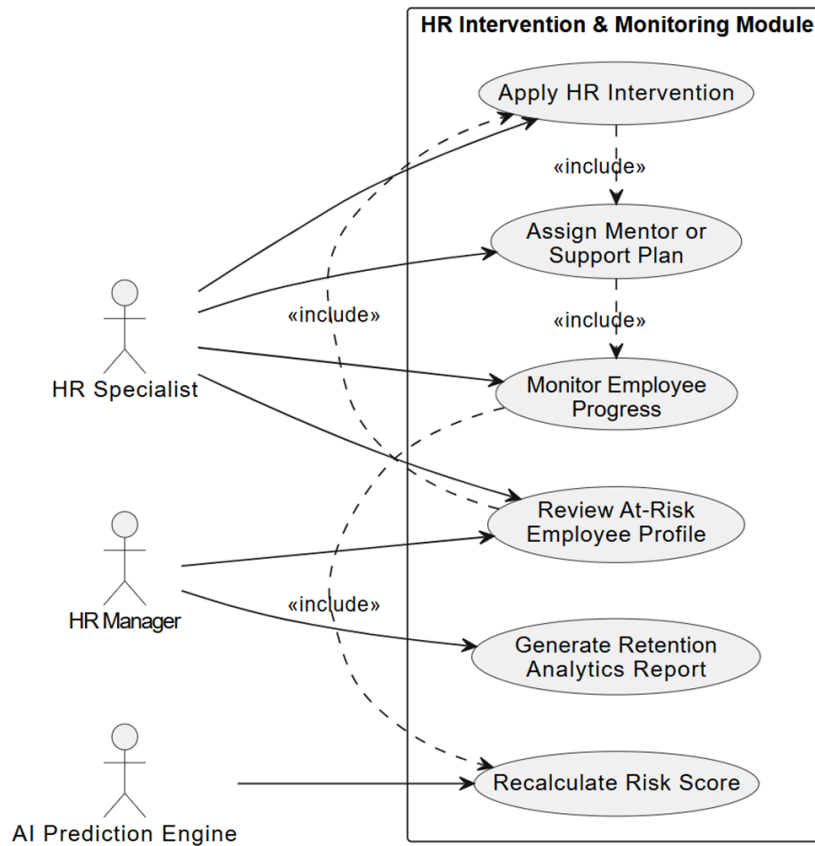

#	User Story (As a ... I want to ...)
1	As an HR Specialist, I want the system to evaluate employee risk scores against predefined thresholds so I can identify high-risk employees.
2	As an HR Specialist, I want the system to automatically flag high-risk employees so I can review their situation promptly.
3	As an HR Specialist, I want to receive notifications when an employee is identified as high risk so I can intervene early.
4	As an HR Specialist, I want notifications to include key employee information so I can quickly understand the situation.
5	As an HR Manager, I want to view a dashboard of employees with their turnover risk levels so I can monitor overall onboarding performance.

6	As an HR Manager, I want to filter employees by risk level or department so I can focus on critical cases.
7	As an HR Manager, I want to sort employees by highest risk so I can prioritize urgent cases.
8	As an HR Specialist, I want the system to continuously monitor employee onboarding behavior so I can detect potential risks early.

Epic 3: HR Intervention & Monitoring

#	User Story (As a ... I want to ...)
1	As an HR Specialist, I want to review detailed information about at-risk employees so I can understand the factors contributing to their turnover risk.
2	As an HR Specialist, I want to view the key indicators affecting risk scores so I can take appropriate actions.
3	As an HR Specialist, I want to apply intervention actions for at-risk employees so I can help improve their onboarding experience.
4	As an HR Specialist, I want to assign mentors or additional support to at-risk employees so I can improve their engagement.
5	As an HR Specialist, I want to schedule follow-up meetings with at-risk employees so I can address their concerns.

6	As an HR Specialist, I want the system to track all interventions applied so I can maintain a history of actions taken.
7	As an HR Manager, I want to track changes in employee risk levels after interventions so I can evaluate whether the actions taken were effective.
8	As an HR Manager, I want to receive reports about turnover risk trends so I can improve onboarding strategies.
9	As an HR Manager, I want to analyze which interventions are most effective so I can optimize HR practices.
